Press Release

Robinair introduces industry-first multicolor backlight on new RAVG-1 Digital Micron Gauge in North America

- Industry-first multicolor backlight provides instant status indicator
- RAVG-1 Digital Micron Gauge uses microelectromechanical sensor (MEMS) Pirani type sensor to directly and accurately measure vacuum level
- Gauge unaffected by outside temperature

OWATONNA, Minn., – Robinair has released the RAVG-1 Digital Micron Gauge with industry-first multicolor backlight providing an instant indicator of acceptable vacuum or leakage. The backlight shows green, yellow or red for faster reading and diagnosis of an A/C system, indicating a system leak or proper vacuum.

The patent-pending design employs a sophisticated microelectromechanical sensor (MEMS) Pirani type sensor with ability to read Atmosphere down to 10 microns. The gauge can measure vacuum pressure in microns, mmHg, inHg, mBar, Pascals or Torr for near-universal applications, and is encased in an impact and water resistant case with a protective rubber boot.

“This gauge will be used in some extreme environments and condition, and is the only one on the market unaffected by temperature, vital to providing accurate readings and performance,” said Tim Wagaman, Robinair Product Manager. “Coupled with the color-coded backlit display, RAVG-1 will provide a quick and easy indication of system evacuation status.”

Robinair’s RAVG-1 kit includes carrying case and tee adapters or inline connectors (1/4” MFL x ¼” MFL and ¼” FFL x ¼” MFL versions.) Secured by a magnetic hook or manifold connection, the large display will always be accessible and in view when in use, allowing for faster testing and readouts. Battery power eliminates the need for cumbersome cables while automatic shutoff helps prolong battery life.
For the HVAC industry, Robinair also manufactures the RG3 and RG6 portable refrigerant recovery machines handling almost all refrigerants including common CFC, HFC, HCFC refrigerants including R-401A. Each machine features a high pressure safety shut-off switch, oil-less compressor, IEC connector and power cord among other machine-specific features.

About Robinair:  
Robinair, a Bosch Automotive Service Solutions brand, is a global leader in service tools and equipment based in Owatonna, Minnesota. Products serve the heating/ventilating/air conditioning/refrigeration (HVAC-R) and mobile markets, which includes the automotive aftermarket along with other industries such as agriculture and construction. For more information on Robinair, visit www.robinair.com

About Bosch:  
The Bosch Group is a leading global supplier of technology and services. According to preliminary figures, its roughly 281,000 associates generated sales of 46.4 billion euros ($61.6 billion) in 2013*. The Bosch Group comprises Robert Bosch GmbH and its more than 350 subsidiaries and regional companies in some 60 countries. If its sales and service partners are included, then Bosch is represented in roughly 150 countries. Its operations are divided into four business sectors: Automotive Technology, Industrial Technology, Consumer Goods, and Energy and Building Technology. This worldwide development, manufacturing, and sales network is the foundation for further growth. In 2013, Bosch applied for some 5,000 patents worldwide. The Bosch Group’s products and services are designed to fascinate, and to improve the quality of life by providing solutions which are both innovative and beneficial. In this way, the company offers technology worldwide that is “Invented for life.” Additional information on the global organization is available online at www.bosch.com, www.bosch-press.com, and http://twitter.com/BoschPresse.

In the U.S., Canada and Mexico, the Bosch Group manufactures and markets automotive original equipment and aftermarket products, industrial drives and control technology, power tools, security and communication systems, packaging technology, thermotechnology, household appliances, healthcare telemedicine and software solutions. For more information, please visit www.boschusa.com, www.bosch.com.mx and www.bosch.ca.
